PHP DAY 2015

ONE DAY OF MODERN WEB-TECHS!

The **PHP Developers Group from Montevideo** has been organizing monthly activities since June 2013 in order to empower the local PHP community. With all this acquired experience during this time, and driven by the organizers of PHPday Argentina, we decided to go a step further and make the first event in Uruguay focused on PHP and related Web technologies.

We would like to invite you to participate in the first **PHPday** (http://phpday.uy) to be held on Saturday August 8, 2015, from 9am to 6pm on the university Instituto Tecnológico Superior Buceo.

We will have 18 sessions of one hour each (3 tracks in parallel) about different topics, presented by members of the PHP community of Uruguay and the region, such as:

- Testing
- Frameworks
- CMS
- Best Practices

- APIs
- Databases
- DevOps

The 3 main objectives of the event are:
- Empower and solidify the local PHP community.
- Encourage IT students.
- Offer a high quality day for professional update and networking.

The target audience are PHP developers, as well as related web technologies professionals and IT students.

There are different ways of supporting the event:
- Financial support of U$S 500.
- Give away items for the community (books, hardware, etc)

The event is non-profit, free of charge and all funds will be poured into resources and facilities' needs for the event. We are open to other forms of support (contact us through info@phpday.uy).

Thank you very much, and we look forward to your support.
